

Method for synthesizing ectomycorrhiza in vitro

The present invention relates to a method for colonizing a root-organ from a plant with a mycorrhizal fungus that is representative of the naturally process of colonization of plant roots by mycorrhizal fungi. The present invention also relates to the use of this method for studying in vitro the colonization of plant roots with a mycorrhizal fungus and to an in vitro model for studying the colonization of plant roots with a mycorrhizal fungus.
